Summary

- 2 day course
- OFSTED Approved
- Certification valid for 3 years
- **FREE** AED use and Emergency Oxygen use

Course Description

An innovative course which combines CPR, AED and First Aid Training that teaches participants how to provide emergency care for injured or ill children (aged one to puberty) and infants (less than one year old).

Participants learn about the types of medical emergencies that children face, and how they differ from adult conditions. The curriculum also includes the importance of attending to basic emergency situations with children, the emotional aspects of caring for children, secondary care for children, and preventing common injuries and illnesses in children.

The course includes both primary care (CPR) and secondary care (first aid) skills. The primary care portion of the course prepares the rescuer to render aid to an infant or child with a life-threatening emergency such as choking or cardiac arrest. Secondary care focuses on developing secondary patient care skills and building the rescuer's confidence to render first aid to an infant or child in need when emergency medical services are either delayed or unavailable. The Care for Children course content is based on guidelines from the Paediatric Working Group of ILCOR (International Liaison Committee on Resuscitation).

Skills:

- Scene Safety Assessment
- Barrier use
- Primary Assessment
- Cardio Pulmonary Resuscitation (CPR) – Infant and Child
- Obstructed Airway Management - Infant and Child
- Serious Bleeding Management
- Shock Management
